

Packaging Aids FUTURA JR. 300 Heat Sealer

Table Top Hand Operated Sealer

The **Futura Jr. 300** is an economical hand operated tabletop heat sealer designed for low volume packaging. It uses an innovative sealing technique that consists of a suspended wire which is heated to a constant temperature under its sealing cover. Sealing occurs in seconds by transferring the heat to the film through the cover. It's even possible to have a cooling time by simply keeping the jaws closed. This method provides the quality of an impulse seal - without the impulse!

Standard Features and Benefits Futura Jr. 300

- Versatility
- High Reliability
- No Downtime
- Instant Heat (ready for sealing in only 5 to 6 seconds after power on)
- Up to 12" wide seals on polyethylene from 1 to 8 mil thick.
- Three temperature settings.
- Low power consumption.
- Perfectly Priced Sealer for Low Volume Manufacturing.

Specifications:

Seal Length	Up to 12"
Seal Width	1/8"
Electrical	115 VAC
Power Consumption	24 Watts
Dimensions	Base 17½"L X 4¼"W X 7½"H (44.5 cm X 11.5 cm X 19 cm)
Weight	8 lbs. (3.64 kg)
